### Retro Modern Gives Mid-Century Furniture a Recycled Makeover

by **Jenny Tranter**, 01/25/11

filed under: [Green Products](#), [green Interiors](#), [green furniture](#)

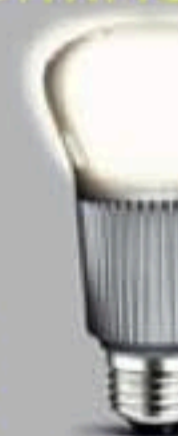

Why purchase a brand new piece of furniture, when your grandmother's old mid-century sideboard can undergo the ultimate makeover and be **recycled** into a masterpiece ready to last another 50 years? The Australia-based modernist furniture restorers at **Retro Modern** source and restore worn mid-century sideboards, buffets and tables, and recreate them into stylish and functional pieces with a cool **modern-day twist**. Svelte black and brightly-coloured laminates replace old sliding doors, drawer fronts and table tops, whilst retaining the pieces' classic modern aesthetic. Family heirlooms can remain in your home too – a custom design service allows you to make your own selection from a range of laminates and handles, bringing your once tired and battered family treasure back to a functional and funky new life.
